

Blackberry PDA Payment Advantage

Blackberry PDA Payment

The Future in the Palm of Your Hand

Perform highly secure cardbased transactions with speed and ease on your Blackberry. A secure and sophisticated solution offering payment processing support on a wide range of Blackberry PDA devices. Add our payment processing services to a Blackberry you are already using in your business – or add a new Blackberry to your business plan – and expand your mobile capabilities to provide fast and efficient means of increasing sales and revenue opportunities!

Our Blackberry payment processing solutions includes two options. You can use the Blackberry with our software by itself to process manual transactions – or combine it with the Blue Bamboo P25 to provide secure “card present” transactions with the additional card reader and printer functions. Take advantage of the best rates with the Blackberry/P25 combination!

Our Blackberry solutions enable mobile retailers to bring their products and services directly to customers – while also allowing for many other important business service options including email on the same device. This lightweight and versatile solution also supports all of the DFG reporting services including easy integration with backoffice management systems!

The Blackberry/P25 combination is a safe and secure solution to securing payment on the go!

Whether you are in a restaurant, market, sports arena, taxi or even at a customer’s front door, merchants can perform highly secure card- based transactions with ease.

Exceptional Security:

- PCI PED approved
- Secure card reader encryption

Application Versatility:

- Powerful applications for payment processing.
- Easy interface with Blue Bamboo P25 card reader/printer.

With the Blue Bamboo P25:

- Bidirectional 2 track magnetic stripe card reader (3 track optional)
- Bluetooth, USB, or serial (RS232) connection capability.
- Lightweight, portable, and fast, easyload thermal printer
