Raising the Bar High for Low Price

The new 1900 by GenMega represents the highest level of performance and value in a state of the art design.

The 1900 features design improvements that not only enhance the look of the ATM, but also it's functionality.

The Dual Magnetic Head - Swipe Card Reader allows a card to be swiped in either direction. This makes the 1900 easier to use, while reducing card reader jams.

The 1900 includes new security features such as a Vault Door Overlap, a security light, and includes a camera capable design.
