The Future in the Palm of Your Hand **NURIT 8000S**

Portable payment
with an unparalleled
track record

The **NURIT 8000S** gives you precisely what you want in a portable payment device—secure and reliable transaction processing, exceptional flexibility to tailor solutions to your requirements, and best of all, a proven track record that's second to none.

When business is busy and customers are on the go, you need payment to be as fast and effortless as possible. The **NURIT 8000S** offers a large, backlit graphical display and keypad, and convenient touch screen with signature capture capability that allows customers to quickly approve and sign for transactions without juggling pen and paper. Drop-down, on-screen menus and a virtual keyboard simplify usage and minimize errors. Support for a broad spectrum of short and long-range wireless options lets you process transactions any time, anywhere. In addition, rechargeable batteries ensure the device keeps working for you throughout your longest days.

The **NURIT 8000S** securely and efficiently handles a variety of credit, debit, EBT, and value-added transactions such as gift and loyalty cards. The device includes a built-in PIN pad and a fast, quiet, graphical thermal printer. In addition, your transactions and customer data are protected with the help of state-of-the-art anti-fraud features. Further, the device is durable and dependable enough to stand up to the most demanding conditions.

Secure, reliable, versatile, and proven—in short, you've got to hand it to the wireless **NURIT 8000S** from VeriFone.

BENEFITS AT A GLANCE

- **Accept payments anywhere**
- **Easily view the large, backlit display under any lighting condition**
- **Get transactions approved and signed electronically**
- **Enjoy unmatched security, durability, and reliability**

NURIT 8000S

The Future in the Palm of Your Hand

Features & Benefits

Handy Design

- Compact and lightweight device fits neatly in the palm of your hand
- Large, backlit graphical display and ample 18-key keypad with backlighting make the device easy to read and use under any conditions
- Touch screen and stylus support electronic signature capture so consumers can sign right on the screen and be on their way
- Drop-down, on-screen menus and forms, "virtual" keyboard, and other familiar advanced graphical capabilities simplify usage and minimize errors

Very Versatile

- Device is ideal for a variety of markets—delivery and service businesses, restaurants, taxi services, sports arena vendors, and other retailers in need of queue-busting or temporary locations
- Wireless design lets you take payment directly to consumers outside your store, at their table, in their seats at a game and eliminates the need to make patrons hand over their cards
- Wide range of wireless options including GSM/GPRS, and Wi-Fi – for maximum flexibility
- Complete payment processing solution with bi-directional magnetic-stripe card reader, smart card reader, built-in PIN pad, and integrated, high-speed thermal printer delivers maximum convenience
- Support for a long list of accessories such as a docking station, external modem with landline communication options, carrying case and car adaptor provide added flexibility

Powerful Performance

- Fast 32-bit processor speeds transactions to get customers quickly on their way, and ample memory supports multiple applications simultaneously
- Quick-charge batteries keep you going longer when you're in a hurry
- Large removable (SD/MMC) memory card offers extra data storage

Highly Secure

- Meets all Visa and MasterCard security requirements including PCI PED approved for PIN-based transactions
- Secure internal PIN pad and advanced encryption protects against fraud
- Tamper resistance and tamper evidence features guard against physical access to device

Compact solution fits neatly in the palm of your hand for quick and easy transactions

NURIT 8000S provides a large, white backlit graphical display; ideal for darker environments; and supports touch screen for electronic signature capture.
